

Ankit Deshpande

Java Backend Developer

ankitdeshpande1998@gmail.com | 7887977547 | Pune, Maharashtra | [Linkedin](#) | [Github](#) | [Portfolio](#)

SUMMARY

Backend Developer with 2+ years of professional experience building scalable systems with Java & Spring Boot, deploying cloud-native solutions on AWS & Azure, with working knowledge of React & TypeScript on the front-end. Demonstrated track record of optimizing system performance, migrating microservices server less workloads, and reducing manual business workflows by up to 80%. Adept at translating complex product requirements into robust, high-availability software solutions within fast-paced Agile environments.

EXPERIENCE

ZET (Credit card and fintech app), SDE intern

02/2026 – 06/2026 | Bengaluru

- Microservices Transition: Re-architected a partner monolithic application into a multi-module microservices structure, eliminating code duplication and establishing independent deployability.
- API Integrations: Authored low-level designs and executed end-to-end UAT/production integration for lending partner FatakPay and SafeGold investment APIs.
- User Retention & Experimentation: Developed automated user churn-reduction flows featuring ZET Plus custom rewards; utilized GrowthBook for A/B testing and feature flagging.
- Cloud Modernization: Ported serverless Lambda workloads to Azure Functions and upgraded AWS Lambda runtimes from Python 3.9 to 3.12.

Agile Soft Systems, Software Engineer

01/2024 – 09/2025 | Pune

1. Project: Work Excellence

- API Development & Security: Engineered multi-tenant RESTful APIs, ACL-based role management, and Google Sign-In for 10+ clients and 100+ users per tenant.
- Architecture & Data Structures: Designed hierarchical node inheritance, data lifecycle archiving workflows, and revision tracking, cutting accidental data loss by 90%.
- Efficiency & Visualization: Built reusable modules that slashed repetitive coding by 40% alongside a "paint-by-letters" data visualization module.
- Reporting & Optimization: Generated complex Jasper Reports (PDF/CSV) and optimized code performance, improving decision speeds by 25% and API response times by 30%.
- Agile Collaboration: Participated in peer code reviews and sprint delivery with QA/DevOps teams for a platform serving 1,000+ active users.

2. Project: Innovatix

- AI Automation: Automated end-to-end Delphi AI digital personality setups, reducing manual configuration workloads by 80% to scale deployments to 50+ assistants daily.
- Dynamic APIs: Developed dynamic configuration management APIs that enabled zero-code personality changes and accelerated deployment speeds by 70%.
- Cross-Functional Alignment: Collaborated with product managers and AI researchers to seamlessly integrate enterprise-grade AI feature requirements.

EDUCATION

Full Stack Web Development, Masai School

10/22 – 10/23 | Bengaluru

- Pursued intensive program on Backend Engineering, building scalable full-stack applications with hands-on experience with RESTful APIs, authentication, and team projects.

B.Voc in Software Development, Marathwada Institute of Technology

04/17 – 03/21 | Chhatrapati Sambhajnagar

- Strengthened data structures, algorithms, and OOP skills. Also covered programming fundamentals, databases, and networking.

SKILLS

Programming Languages and Libraries

Java, JavaScript, SQL Spring, Spring Boot, Hibernate, ReactJs, NextJs

Tools & Platforms

AWS, Azure, Git, Postman, JIRA, Jasper Reports, Eclipse, RESTful APIs, Microservices Architecture, Moengage, GrowthBook

Soft skills

Agile Methodologies, Problem Solving, Cross-functional Collaboration, Requirement Analysis

PROJECTS

Book My Bus , Tech Stack: Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript

- Core Logic: Built a scalable Spring Boot backend for route scheduling, seat allocation, and real-time availability tracking.
- Booking Workflow: Engineered a seamless reservation flow with secure authentication and robust server-side data validation.
- Admin Management: Developed a centralized dashboard to manage bus fleets, travel schedules, and user reservations.
- Data Integrity: Utilized Hibernate and MySQL for reliable transaction handling and consistent relational data storage.

The Wild Oasis , Tech Stack: React.js, Next.js, Supabase, Tailwind CSS, Auth.js, React Query

- Full-Stack Architecture: Engineered a high-end cabin rental platform using Next.js and Supabase, implementing real-time data synchronization for instant booking updates.
- Secure Authentication: Integrated Auth.js to handle multi-provider login and secure guest profiles, ensuring protected access to personal booking histories.
- Dynamic Booking Engine: Developed a robust reservation system featuring interactive availability calendars and a personalized guest dashboard for managing stays.

Wheel Estate , Java, Hibernate, Mysql

- Built a structured management system to track vehicle details, availability status, and real-time fleet inventory tracking.
- Developed a secure and user-friendly booking flow for customers to select vehicles and schedule rental durations.
